## New range by ICL

International Computers, Ltd, has announced the introduction to New Zealand of a new range of computers.

Known as the "S" series, the new equipment has been designed to enhance rather than replace existing machines.

There are four new computers on the S series and all are fully compatible with the company's 1900 range.

The company has also introduced a wide range of support equipment and advanced software, including highly sophisticated management aids in the control of large amounts of data.
